DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, drawn to a pipe tong, classified in class 81, subclass 57.16.
 - II. Claims 24-26, drawn to a method of making up pipe sections, classified in class 29, subclass 428.
 - III. Claims 27-30 and 32-38, drawn to a bit holder/wrench combination and a positioning device for a wrench, classified in class 166, subclass 77.51.
 - IV. Claim 31, drawn to wrench jaw, classified in class 81, subclass 57.33.
 - V. Claims 39-47, drawn to torque flange, classified in class 81, subclass 467.
 - VI. Claims 48-55, drawn to a flange and positioning device combination, classified in class 81, subclass 429.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, III, IV, V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention each of the subcombinations does not require the others and is capable of use in any type of power tool and has separate utility such as the Group V and VI are capable of use of any type of power tool, e.g. a pipe cutter, and the bit holder/wrench of Group III is not required in the tong of Group I. See MPEP § 806.05(d).

Art Unit: 3723

3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the tong of Group I can be used to apply rotation to any type of object, not just pipe strings.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3723

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 703-308-1746. The examiner can normally be reached on M-Th (7:05- 4:35) first Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail, III can be reached on 703-308-2687. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
